

WS04 Pain Surgery Workshop

Monday, June 24, 2019

Pain is one of the important subgroup of functional neurosurgery. There have been several advancement in the technology of neuromodulation in pain. Similarly, there have age old traditional techniques, which are infrequently practiced, that can offer long lasting relief of various kinds of pain. We have designed this workshop to comprehensively cover both these aspects of pain neuromodulation, that would be useful to a functional neurosurgeon.

08:00 - 12:00

Nassau

Coordinator: Paresh Doshi (India)

Chair: Konstantin Slavin (USA)

Chair: Jan Vesper (Germany)

Cordotomy

Invited Speaker: Ido Strauss (Israel)

Nucleus Caudalis DREZ lesioning

Invited Speaker: Amr ElNaggar ()

DBS for pain

Invited Speaker: Alex Green (United Kingdom)

Surgical treatment of headache syndromes

Invited Speaker: Paresh Doshi (India)

Motor cortex stimulation

Invited Speaker: Jan Vesper (Germany)

Hands-On Integration

Invited Speaker: Ellen Air (USA)

DRG and Peripheral Nerve stimulation for pain

Invited Speaker: Timothy Deer (USA)

Trigeminal and Sphenopalatine ganglion stimulation

Invited Speaker: Milind Deogaonkar (USA)

Novel techniques and devices for neuromodulation of pain

Invited Speaker: Konstantin Slavin (USA)

Pathophysiology of pain and MRGFUS lesioning for pain

Invited Speaker: Daniel Jeanmonod (Switzerland)
